**Fr. Agnel Ashram, Bandstand, Bandra (W), Mumbai – 400 050**  
**(Autonomous College affiliated to University of Mumbai)**

**Preamble:**

Greetings and congratulations to all the education partners Fr Conceicao Rodrigues College of Engineering for getting autonomous status to the college from the year 2024-25. University Grant Commission vide letter No. F. 2-10/2023(AC-Policy) dated 23<sup>rd</sup> Nov 2023 conferred the autonomous status to Fr. Conceicao Rodrigues College of Engineering, Fr. Agnel Ashram, Bandstand, Bandra (West), Mumbai 400050 affiliated to University of Mumbai for a period of 10 years from the academic year 2024-2025 to 2033-2034 as per clause 7.5 of the UGC (Conferment of Autonomous Status Upon Colleges and Measures for Maintenance of Standards in Autonomous Colleges) Regulations, 2023. We look towards autonomy as a great opportunity to design and implement curriculum sensitive to needs of Learner, Indian Society and Industries.

We commit to ourselves to the effective implementation of UGC Regulations and NEP 2020 in its spirit. Government of Maharashtra has directed Autonomous Colleges to revise their curriculum in line with National Education Policy (NEP) 2020 through Government Resolution dated 4<sup>th</sup> July 2023. Accordingly, degree options are given to the students admitted from academic year 2024-25 based on UGC circulars and *DTE guidelines ref no. 17/DTE/NEP-2020/2024/111 dated 4th June 2024* related to implementation of NEP. Based on recent recommendations of the GR, we are pleased to offer our holistic curriculum, a **“H-Tree Model”** of Engineering Education. A unique **“H-Tree Model”** of Engineering Education Curriculum is carefully designed to systematically develop IQ (Intelligence Quotient), PQ (Physical Quotient), EQ (Emotional Quotient) and SQ (Spiritual Quotient) of a learner. This curriculum aims at the development of an **all-rounded** personality with **holistic** approach to education in which learner receives **25% teacher-led learning, 25% peer learning, 25% self-learning and 25% experiential learning**. The curriculum model is outcome based that focuses on learning by doing. Curriculum is designed to provide multiple learning opportunities for students to acquire and demonstrate competencies for rewarding careers. It ensures multiple choices to learner acquiring skills through systematic planning. It has 7 verticals aligned to GR recommendations with strong science, and mathematics foundation and program core, sequel of electives, Multidisciplinary Minor courses, humanities & management courses and sufficient experiential learning through projects and semester-long industry / research internship along with employable skill-based courses. Learner gets an opportunity to acquire skills through NSDC aligned courses during summer vacations. Learner also gets additional option to choose the kind of degree i.e. Honors or Double Minor or Honors with Research. Various steps are taken to transform teaching learning process to make learning a joyful experience for students. We believe that this curriculum will raise the bar of academic standards with the active involvement and cooperation from students, academic and administrative units.

| RM                                                   | Research Methodologies                            |
| CEFP                                                 | Community Engagement or Field Project             |
| ELC                                                  | Experiential Learning Courses                     |
| PRJ                                                  | Project                                           |
| INT                                                  | Internship                                        |
| CC                                                   | Cocurricular Courses                              |
| DM                                                   | Double Minor                                      |
| HR                                                   | Honors with Research                              |

**Credit Specification:**

- ❖ Theory: 1 credit=13 to 15 hrs of teaching
- ❖ Lab: 1 Credit=26 to 30 hrs of lab work
- ❖ Studio Activities: 1 Credit= 26 to 30 hrs of creative activities
- ❖ Workshop Based Activities: 1 Credit=26 to 30 hrs of hands-on activities related to vocation/professional practice/skill based
- ❖ Seminar/Group Discussion: 1 Credit=13 to 15 hrs of participation
- ❖ Internship: 1 Credit=Per 2 weeks OR 36 to 40 hrs of engagement
- ❖ Field Based Learning/Practices: 1 Credit=26 to 30 hrs of learning activities
- ❖ Community Engagement Projects: 1 Credit=26 to 30 hrs of contact time along with 13 to 15 hrs of activities preparation, report writing, independent reading etc.

Society of St. Francis Xavier, Pilar's  
**Fr. Conceicao Rodrigues College of Engineering**  
 Fr. Agnel Ashram, Bandstand, Bandra (W), Mumbai – 400 050  
 (Autonomous College affiliated to University of Mumbai)

**Credit requirements for different options of the Degrees:**

| Degree/SEM                                                          | I  | II        | III       | IV        | V         | VI        | VII        | VIII       | Total |
|---------------------------------------------------------------------|----|-----------|-----------|-----------|-----------|-----------|------------|------------|-------|
| B.Tech with Multidisciplinary Minor                                 | 20 | 20        | 22        | 22        | 22        | 22        | 20         | 20         | 168   |
| B.Tech with Double Minor (Multidisciplinary & Specialisation Minor) | 20 | 20<br>+2* | 22<br>+4* | 22<br>+4* | 22<br>+4* | 22<br>+4* | 20<br>+2\$ | 20<br>+2\$ | 188   |
| B.Tech with Research and Multidisciplinary Minor                    | 20 | 20<br>+2* | 22<br>+4* | 22<br>+4* | 22<br>+4* | 22<br>+4* | 20<br>+2\$ | 20<br>+2\$ | 188   |

\*Optional Credits

\$ optional 2 credits can be earned either in VII or VIII Semester

1. Learners who earn a minimum of total **168 credits** will be awarded “**B.Tech in Engg. /Tech. with Multidisciplinary Minor (MDM)**” degree.

2. Learners will have the following options to earn **B. Tech. in Engg. /Tech. degree in**

**a. Major Engg./Tech Discipline with Double Minor (Multidisciplinary and Specialization Minor)**

**b. Honors with Research and Multidisciplinary Minor**

**a) Major Engg./Tech Discipline with Double Minor (Multidisciplinary and Specialization Minor) (additional 20 credits): 168 +18+2(SEM II) =188 Min Credits.**

There will be four courses (4 credits each), one in each semester starting from the 3rd semester which will be from emerging areas of specialisation. In 7<sup>th</sup> or 8<sup>th</sup> semester students will complete 2 credits seminar/project. **Admission eligibility min CGPA=7.5 after First year**

**b) B.Tech in Engg./ Tech.- Honors with Research and Multidisciplinary Minor (additional 20 credits by research): 168 +18+2 (SEM II) =188 Min Credits. (Admission eligibility min CGPA=7.5 after First and should maintain CGPA=7.5 after Third year)**

3. Learner can earn the certificate/Diploma/Degree based on his/her exit from the program as follows. College shall explore feasibility to offer NSDC aligned skill based courses to the learners:

a. UG Certificate: After a one-year (40 credits to be earned) and 8-credits summer workshop/vocational courses/internship

b. UG Diploma: After two-years (80 credits to be earned) and 8-credits summer workshop/vocational courses/internship/Project

c. B. Voc.: After three-years (120 credits to be earned) and 8-credits summer workshop/vocational courses/internship/Project

**Fr. Agnel Ashram, Bandstand, Bandra (W), Mumbai – 400 050**  
**(Autonomous College affiliated to University of Mumbai)**

**Salient Features of Curriculum:**

- ✓ Framed as per Government Resolution dated 4<sup>th</sup> July 2023 in line with National Education Policy (NEP) 2020.
- ✓ Minimum 165 choice-based credit structure with options of Degrees earning additional credits
- ✓ Unique 'H-Tree' Model of Curriculum: Hybrid model for holistic development with happy learning environment having bridge connecting verticals providing unique path for each learner for 3-dimensional growth, Life Long Learning, multiple entry-exit, inclusive model indicating equal distribution of central resources
- ✓ More emphasis on laboratory based and experiential learning
- ✓ More weightage to continuous assessment to reduce examination stress
- ✓ Mandatory Semester-long internship, courses with emotional & spiritual learning and skill-based learning aligned with NSDC framework
- ✓ Well balanced curriculum to attain Program Outcomes and skills of 21<sup>st</sup> century learner
- ✓ Curriculum is designed to create excitement among learners for education through stories, activities, collaboration, hackathon, contest, case studies, creative art etc.
- ✓ Curriculum is designed to make graduates responsible citizens of country with future ready skills to handle challenges of 21<sup>st</sup> Century

|----------------------------|-----|---------------------------------------------------------------------------------------|
| Course Outcomes            | CO1 | Implement diagonalization of a given matrix using eigen values and eigen vectors.     |
|                            | CO2 | Execute Higher order derivatives of a given functions                                 |
|                            | CO3 | Apply partial differentiation technique to obtain the extremum of the given function. |
|                            | CO4 | Demonstrate basic knowledge of analytic functions in solving engineering problems.    |

**Course Assessment:**

**Theory:**

**ISE-1:** MCQ: 20 Marks

**ISE-2:** MCQ: 20 Marks

**MSE:** 90 minutes 30 Marks written examination based on 50% syllabus

**ESE:** 90 minutes 30 Marks written examination based on the syllabus after MSE

**Tutorial:**

1. ISE-1 will be conducted for the first two tutorials. Continuous pre-defined marks-based evaluation for 20 marks.

2. ISE-2 will be conducted for the remaining two tutorials (20 marks) and four Matlab / Scilab practical (10 marks). Continuous pre-defined marks-based evaluation for 30 marks

|----------------------------|-----|--------------------------------------------------------------------------------------------------------------------------------|
| <b>Course Outcomes</b>     | CO1 | Derive the conditions for intensity maximum and minimum in interference and diffraction of light and solve numerical problems. |
|                            | CO2 | Derive Schrodinger equation in time dependent and independent form and solve it for particle in a box problem.                 |
|                            | CO3 | Explain the working of lasers and optical fiber and their applications.                                                        |
|                            | CO4 | Explain Fermi level and its variations in semiconductors and derive expression for Hall Effect.                                |
|                            | CO5 | Explain the Physical principles of sensors and their applications.                                                             |

| Pre-requisite Course Codes |     |                                                                                                                   |
|----------------------------|-----|-------------------------------------------------------------------------------------------------------------------|
| <b>Course Outcomes</b>     | CO1 | To draw Projection of Points, Lines and Planes                                                                    |
|                            | CO2 | To draw projections in Projection of solids                                                                       |
|                            | CO3 | To draw sectional views in Section of solids and draw the development of lateral surfaces of solids with sections |
|                            | CO4 | To apply the basic principles of projections in converting 3D view to 2D drawing.                                 |
|                            | CO5 | To visualize an object from the given two views                                                                   |
|                            | CO6 | To use Computer Aided Drafting tools for drawing various views including Isometric Views                          |

| Module No. | Unit No. | Topics                                                                                                                                                                                                                                         | Ref. | Hrs. |
|------------|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|------|
| 1          | 1.1      | <b>Introduction to Engineering Graphics</b><br>Principles of Engineering Graphics and their significance, usage of Drawing instruments, Types of Lines, Dimensioning Systems as per IS conventions. Introduction to plain and diagonal scales. | 1,4  | 1    |
|            | 1.2      | <b>Engineering Curves</b><br>Basic construction of Cycloid, Involute and Helix (of cylinder) only.                                                                                                                                             |      | 2    |
| 2          | 2.1      | <b>Projection of Points and Lines</b><br>Lines inclined to both the Reference Planes (Excluding Traces of lines) and simple application based problems on Projection of lines.                                                                 | 1,4  | 3    |
|            | 2.2      | <b>Projection of Planes</b><br>Triangular, Square, Rectangular, Pentagonal, Hexagonal and Circular planes inclined to either HP or VP only. (Exclude composite planes).                                                                        |      | 1    |
|            | 2.3      | <b>Projection of Solids</b><br>(Prism, Pyramid, Cylinder, Cone only) Solid projection with the axis inclined to HP and VP. (Exclude Spheres, Composite, Hollow solids and frustum of solids). Use change of position or Auxiliary plane method |      | 3    |
|            | 2.4      | <b>Section of Solids</b><br>Section of Prism, Pyramid, Cylinder, & Cone cut by plane perpendicular to at least one reference plane (Exclude Curved Section Plane). Use change of position or Auxiliary plane method.                           |      | 3    |

|--------------|-----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|-----------|
| 3            | 3.1 | <b>Orthographic:</b> - Fundamentals of orthographic projections. Different views of a simple machine part as per the first angle projection method recommended by I.S. Full or Half Sectional views of the Simple Machine parts                   | 1,2,4 | 3         |
|              | 3.2 | <b>Sectional Orthographic Projections</b><br>Full or Half Sectional views of the Simple Machine parts                                                                                                                                             |       | 3         |
| 4            | 4.1 | <b>Isometric Views:-</b> Principles of Isometric projection – Isometric Scale, Isometric Views, Conversion of Orthographic Views to Isometric Views(Excluding Sphere ).                                                                           | 1,2,4 | 3         |
|              | 4.2 | <b>Missing Views:</b> The identification of missing views from the given views. Create the third view from the two available views so that all the details of the object are obtained                                                             |       | 3         |
| 5            | 5.1 | <b>Development of Lateral Surfaces</b><br>Lateral surface development of Prism, Pyramid, Tetrahedron, Hexahedron, Cylinder, Cone with section plane inclined to HP or VP only. (Exclude DLS of a solid with a hole in it and Reverse Development) | 1,4   | 3         |
| <b>Total</b> |     |                                                                                                                                                                                                                                                   |       | <b>28</b> |

**Course Assessment:**

**Theory:**

**ISE-1:**

Team Activity: Two Hours Duration: 20 Marks

Making Models out of Card Boards/Clay for Basic Primitive solids. Solids will be cut by Section plane as per instructions provided Drawing Projections of Same as per instructions will be part of activity. Here Cut sections will also be developed using development principles. There will be small quiz or students will give a demonstration of Project or activity

Assessment will be done by two teachers in the department who are teaching engineering graphics

**ISE-2:** Two hours 20 Marks

Team Activity

Here One Simple component either machine component/Any simple component will be given to group of students in team. Students will measure dimensions and make working drawing of same showing all three views/sectional views including isometric view. At the end of activity Group will give presentation on same

**MSE:** 90 minutes **30 Marks** written examination based on 50% syllabus

**ESE:** 90 minutes **30 Marks** written examination based on remaining syllabus after MSE

**Course Assesment:- (Lab)**

1. ISE-1 will be conducted for four activities (A1,A2,A3,A4) Continuous pre-defined rubrics-based evaluation for 20 marks.

2. ISE-2 will be conducted for four activities (A5,A6,A7,A8) Continuous pre-defined rubrics-based evaluation for 30 marks.

**Recommended Books:**

1. N.D. Bhatt, "Engineering Drawing (Plane and solid geometry)", Charotar Publishing House Pvt. Ltd
2. N.D. Bhatt & V.M. Panchal, "Machine Drawing", Charotar Publishing House Pvt.Ltd.

**Society of St. Francis Xavier, Pilar's**  
**Fr. Conceicao Rodrigues College of Engineering**  
**Fr. Agnel Ashram, Bandstand, Bandra (W), Mumbai – 400 050**  
**(Autonomous College affiliated to University of Mumbai)**

3. Prof. Sham Tickoo (Purdue University) & Gaurav Verma, "( CAD Soft Technologies)  
:Auto CAD 2012 (For engineers and Designers)", Dream tech Press New Delhi
4. Dhananjay A Jolhe, Engineering Drawing, Tata McGraw Hill.

| Pre-requisite Course Codes |     |                                                                                                              |
|----------------------------|-----|--------------------------------------------------------------------------------------------------------------|
| Course Outcomes            | CO1 | Explain the problem solving aspects using various programming paradigms.                                     |
|                            | CO2 | Illustrate programming principles, decision making statements, looping constructs.                           |
|                            | CO3 | Demonstrate modular programming using functions                                                              |
|                            | CO4 | Demonstrate the applications of derived data types such as arrays, pointers, strings and functions.          |
|                            | CO5 | Apply various C++ constructs such as classes, objects, static members, access specifiers                     |
|                            | CO6 | Apply the concept of inheritance to achieve code reusability and virtual functions for run time polymorphism |

|----------|----------------------------------------------------------------------------------------|
| <b>1</b> | Programs using Basic Control Structures, branching and looping.                        |
| <b>2</b> | Programs for the use of 1-D, 2-D arrays and String.                                    |
| <b>3</b> | Demonstrate the use of Functions with different types of parameter passing mechanisms. |
| <b>4</b> | Demonstrate the use of Pointers                                                        |
| <b>5</b> | Program on Structures and pointer to Structure.                                        |
| <b>6</b> | Programs on basics of Object Oriented Programming Construct,                           |
| <b>7</b> | Program to demonstrate various categories Inheritance.                                 |
| <b>8</b> | Program to apply kinds of Polymorphism.                                                |

**Course Assessment:**

**Theory:**

**1. ISE-1: Quiz:** 10 marks.

**Assignments:** 10 marks

**2. ISE-2: Mini-Project:** 20 marks

**MSE:** 90 minutes **30 Marks** written examination based on 50% syllabus

**ESE:** 90 minutes **30 Marks** written examination based on remaining syllabus after MSE

**Lab:**

**1. ISE-1** Four experiments. Continuous pre-defined rubrics-based evaluation for 20 marks.

**2. ISE-2**

a. Four experiments. Continuous pre-defined rubrics-based evaluation for 20 marks.

b. Practical Exam: 10 marks

**Tutorial:**

(Minimum 10 Tutorials covering all modules)

ISE-1 for 20 Marks: Based on first 04 Tutorials of 5 marks each

ISE-2 for 30 Marks : Based on remaining tutorials (Minimum 6 tutorials)

**Fr. Conceicao Rodrigues College of Engineering**  
**Fr. Agnel Ashram, Bandstand, Bandra (W), Mumbai – 400 050**  
**(Autonomous College affiliated to University of Mumbai)**

**Course Assessment:**

**Lab:**

**ISE:**

1. ISE-1 will be conducted for first three experiments. (Article discussion, Design thinking workshop for a sample idea, Empathy Map)  
Continuous pre-defined rubrics-based evaluation for 20 marks.
2. ISE-2
  - a. Idea Competition. Continuous pre-defined rubrics-based evaluation for 10 marks.
  - b. Business Model Canvas for identified Idea for 10 marks
  - c. Demo Day – Prototype for 10 marks

| Pre-requisite Course Codes |     |                                                     |
|----------------------------|-----|-----------------------------------------------------|
| Course Outcomes            | CO1 | use Linux commands to perform file operations.      |
|                            | CO2 | use Matlab/ Scilab for scientific computing.        |
|                            | CO3 | use web technology to design web pages.             |
|                            | CO4 | perform CRUD operations using relational databases. |
|                            | CO5 | create scientific document using LaTeX.             |
|                            | CO6 | perform data analysis using spreadsheet.            |

| Module No. | Unit No. | Topics                                                                                                                                                                                                                                                      | Ref. | Hrs.      |
|------------|----------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 1          |          | <b>Introduction to Linux Operating System</b>                                                                                                                                                                                                               | 1    | <b>08</b> |
|            | 1.1      | Demonstration of installation of Linux Operating System                                                                                                                                                                                                     |      | 2         |
|            | 1.2      | Linux command prompt usage, Use of man command, Linux directory structure, finding present working directory in Linux, listing files and directories with different options, changing the directory, creating files and directories using Linux commands    |      | 2         |
|            | 1.3      | Deleting files with rm, deleting folder with -d & -r, moving files and folders with mv, renaming with mv, copying with cp, use of cat command, the wc command, the sort command, Redirection in Linux, Introduction to piping, use of nano and/or vi editor |      | 2         |
|            | 1.4      | Use of locate and find commands, Use of Grep in Linux, use of chmod and chown for giving permissions in Linux                                                                                                                                               |      | 2         |
| 2          |          | <b>Introduction to Scientific Computing using Matlab/ Scilab</b>                                                                                                                                                                                            | 2    | <b>10</b> |
|            | 2.1      | Introduction to Matlab/Scilab, getting data into Matlab/Scilab, creating, concatenating and reshaping arrays, Accessing data in arrays, mathematical and statistical operations with arrays                                                                 |      | 2         |
|            | 2.2      | Taking user input, control structures for making decisions and adapting to different situations, conditional data selection                                                                                                                                 |      | 2         |
|            | 2.3      | Visualizing data using 2D and 3D plots, introduction to toolboxes for different scientific computing tasks, creating and calling functions                                                                                                                  |      | 2         |
|            | 2.4      | Introduction to tables of data, storing and sorting table data, extracting data from table, exporting tables, combining tables, [2]indexing into cell arrays, Working with date and time                                                                    |      | 2         |
|            | 2.5      | Preprocessing data- normalizing data, working with missing data                                                                                                                                                                                             |      | 2         |
| 3          |          | <b>Foundations of web technology</b>                                                                                                                                                                                                                        | 3    | <b>10</b> |
|            | 3.1      | HTML Basics- HTML tags and attributes, Headings in HTML, creating paragraphs in HTML, Basic formatting tags of HTML,                                                                                                                                        |      | 2         |

|              |     |                                                                                                                                                                                                                                                                                                                 |          |           |
|--------------|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------|-----------|
|              |     | giving background and font colors using HTML, creating links using HTML, Adding images in HTML                                                                                                                                                                                                                  |          |           |
|              | 3.2 | Creating tables and lists using HTML, creating forms in HTML, Embedding videos on web page                                                                                                                                                                                                                      |          | 2         |
|              | 3.3 | CSS syntax, CSS selectors, background formatting using CSS, CSS box model, adding borders, margins and padding using CSS, adding styles to fonts using CSS, Positioning using CSS, Pseudo-classes in CSS, CSS navigation bar, creating image gallery using CSS, use of external CSS for creating website layout |          | 2         |
|              | 3.4 | Introduction to Javascript, basic Javascript syntax, Variables in Javascript, operators and control structures in Javascript, functions in Javascript, arrays and number handling in Javascript,                                                                                                                |          | 2         |
|              | 3.5 | DOM manipulation in Javascript, Form validation using Javascript                                                                                                                                                                                                                                                |          | 2         |
| <b>4</b>     |     | <b>Introduction to Database Technology</b>                                                                                                                                                                                                                                                                      | <b>4</b> | <b>02</b> |
|              | 4.1 | Installation of MySQL/Postgresql, creating database schema and tables, DML operations, conditional selection of records from the database tables, demonstration of PHP-MySQL/Postgresql database connectivity                                                                                                   |          | 2         |
| <b>5</b>     |     | <b>Introduction to LaTeX</b>                                                                                                                                                                                                                                                                                    | <b>5</b> | <b>12</b> |
|              | 5.1 | Demonstration of installation and usage of Texlive/MikeTex, formatting words, lines and paragraphs, font formatting, creating section and subsections, use of geometry package                                                                                                                                  |          | 2         |
|              | 5.2 | Insertion of graphics and tables in document, creation of lists, mathematics environment, writing equations                                                                                                                                                                                                     |          | 2         |
|              | 5.3 | Writing algorithms, inserting code in document, creating table of contents, creating hyperlinks                                                                                                                                                                                                                 |          | 2         |
|              | 5.4 | Bibliography management, citations, creating chapters using report class, inserting other .tex and .pdf files in document                                                                                                                                                                                       |          | 2         |
|              | 5.5 | Presentation in LaTeX using beamer class, creating overlay in beamer, blocks in beamer presentation, presentation themes                                                                                                                                                                                        |          | 2         |
|              | 5.6 | Usage of style files in a document                                                                                                                                                                                                                                                                              |          | 2         |
| <b>6</b>     |     | <b>Data analysis using spreadsheet</b>                                                                                                                                                                                                                                                                          | <b>6</b> | <b>10</b> |
|              | 6.1 | Introduction to Microsoft Excel/Open office Calc/Google Sheets, functionality using ranges, use of formulae for basic data analysis (sum, average, if, count, min, max, proper, upper, lower, autosum), sorting, filter, text to column, data validation                                                        |          | 2         |
|              | 6.2 | Use of advance formulae for data analysis (concatenate, vlookup, hlookup, match, countif, text, trim)                                                                                                                                                                                                           |          | 2         |
|              | 6.3 | Creating pivot tables, manipulating pivot table, usage of pivot table tool bar, changing data field properties, displaying a pivot chart, setting pivot table options, adding subtotals to pivot tables                                                                                                         |          | 2         |
|              | 6.4 | Data visualization- creating 2D and 3D plots                                                                                                                                                                                                                                                                    |          | 2         |
|              | 6.5 | Data visualization using conditional formatting- creating formula-based rules                                                                                                                                                                                                                                   |          | 2         |
| <b>Total</b> |     |                                                                                                                                                                                                                                                                                                                 |          | <b>52</b> |

**Fr. Conceicao Rodrigues College of Engineering**  
**Fr. Agnel Ashram, Bandstand, Bandra (W), Mumbai – 400 050**  
**(Autonomous College affiliated to University of Mumbai)**

**Course Assessment:**

**ISE:**

**1. ISE-1**

- a. Quiz based on module 1 for 10 marks.
- b. Completion of any 4 courses from suggested list on module 2 for 20 marks.

Suggested URL and course list:

<https://matlabacademy.mathworks.com/>

- 1. MATLAB Onramp
- 2. Simulink Onramp
- 3. App Building Onramp
- 4. Object-Oriented Programming Onramp
- 5. Simscape Onramp
- 6. Circuit Simulation Onramp
- c. Quiz based on module 2 for 10 marks.
- d. Assignment (web page designing) based on module 3 for 10 marks.

**2. ISE-2**

- a. Quiz based on module 4 for 10 marks.
- b. Assignment (Scientific Document Preparation using LaTeX ) based on module 5 for 20 marks.
- c. Assignment (data analysis using spreadsheet) based on module 6 for 20 marks.

| Pre-requisite Course Codes |     | After successful completion of the course, the student will be able to                                                           |
|----------------------------|-----|----------------------------------------------------------------------------------------------------------------------------------|
| Course Outcomes            | CO1 | Have a working knowledge about the measurement process, units of measurements, static and dynamic characteristics of instrument. |
|                            | CO2 | Identify and classify types of test & measuring instruments that are available in the laboratory                                 |
|                            | CO3 | Find out and verify the manufacturers, make, models, market cost and specifications of the given instrument                      |
|                            | CO4 | Select a suitable test & measuring instrument for any given system, application or a process                                     |
|                            | CO5 | Understand the importance & significance of calibration of measuring instrument                                                  |
|                            | CO6 | Study various quality standards for Measurement, Inspection and Testing                                                          |

**Teaching Learning Methodology: Role Play Model**

**a. Instructor**

Responsibilities : Explain theoretical background, provide required sample formats, guide students in identification of appropriate online material, supervision and assessment of overall activity, summarize the activity

**b. First Group of Students :Customer**

Responsibilities : To finalize specifications of instrument to be purchased prepare request for quotations, prepare comparative statement, preparation for purchase order (PO)

**c. Second Group of Students: Manufacturer / Vendor**

Responsibilities : To maintain the specifications of manufactured instruments, to submit quotations including all applicable taxes, to prepare invoice as per purchase order (PO)

**d. Third Group of Students: Sales/Service Engineer**

Responsibilities : To demonstrate capabilities of various instruments and convince customer to purchase a particular instrument, to prepare Delivery Challan, Install the instrument and prepare Installation report, Demonstrate all the functions and uses of the instrument

**Society of St. Francis Xavier, Pilar's**  
**Fr. Conceicao Rodrigues College of Engineering**  
**Fr. Agnel Ashram, Bandstand, Bandra (W), Mumbai – 400 050**  
**(Autonomous College affiliated to University of Mumbai)**

**Course Assessment:**

**Laboratory work: (ISE)**

**1. ISE-1**

**Total Marks : 50**

- A) After completion of Module 1 and Module 2, **Online Quiz / Q/A Assignment of 30 marks** to be conducted to check theoretical knowledge of measuring instruments and testing tools.
- B) To conduct Minimum 4 experiment from the module 3 (Total marks =  $4 \times 5 = 20$  marks)

**2. ISE-2**

**Total Marks : 50**

- A) To perform role play (Group Activity of 4 students each) (**Total marks = 20 marks**)
- B) To conduct Minimum 6 experiment from the module 3, 4, 5 (Total marks =  $6 \times 5 = 30$  marks)

**Recommended Books:**

- 1. Engineering. Metrology, I.C. GUPTA, Dhanpat Rai Publications.
- 2. Engineering. Metrology, R. K. Jain, Khanna Publisher.
- 3. Engineering Metrology and Measurements, Raghavendra, Krishnamurthy, OUP India, 2013
- 4. Fundamentals of Micro-electronics, Behzad Razavi, Wiley Publications, 2008
- 5. Sensors and Transducers, Second Edition, D.Patranabis, PHI publications, 2003

**Reference Books:**

- 6. J. Millman and A. Grabel, "Microelectronics", Tata McGraw Hill, 2nd Edition.
- 7. Jan M. Rabaey, AnanthaChandrakasan and Borivoje Nikolic, "Digital Integrated Circuits:A
- 8. Design Perspective", Pearson Education, 2nd Edition.
- 9. Engineering Metrology, K. J. Hume, Kalyani publication
- 10. Engineering. Metrology, Hume K.G., M C Donald, Technical &Scientific, London.

**ISE1: 3 Activities**

Public Speaking, Extempore, Aptitude test, presenting through Power point or Poster Making  
 Marks: 40

Learning outcome: Acquiring public Speaking skills for formal events and improving verbal ability

PO10: Communication, PO9: Individual and Team Work, P12: Long Life Learning

**ISE: 2 Activities, 4 assignments**

Marks: 60 Marks

Learning outcome: Efficiently developing listening, reading and writing skills

P10: Communication, PO8: Ethics, PO9: Individual and Team Work, P12: Long Life Learning

| <b>Total Marks</b> |                                               |      | <b>50</b> |

**Course Assessment:**

**Theory:**

**ISE-1:** MCQ: 20 Marks

**ISE-2:** MCQ: 20 Marks

**MSE:** 90 minutes 30 Marks written examination based on 50% syllabus

**ESE:** 90 minutes 30 Marks written examination based on the syllabus after MSE

**Tutorial:**

1. **ISE-1** will be conducted for the first two tutorials. Continuous pre-defined marks-based evaluation for 20 marks.

2. **ISE-2** will be conducted for the remaining two tutorials (20 marks) and four Matlab / Scilab practical (10 marks). Continuous pre-defined marks-based evaluation for 30 marks

**Recommended Books:**

| <b>Course Outcomes</b>     | CO1 | To evaluate the activity and selectivity of the catalyst                                                 |    |
|                            | CO2 | To compare the different types renewable sources of energy                                               |    |
|                            | CO3 | To compare the different types of corrosion and control measures in industries.                          |    |
|                            | CO4 | To determine the quality of fuel and quantify the oxygen required for combustion of fuel.                |    |
|                            | CO5 | To evaluate the different types of fabrication methods, conducting polymers in various industrial fields |    |

| 4 | <b>Title</b> | <b>Fuels and combustion</b><br>Definition, classification, characteristics of a good fuel, units of heat (no conversions). Calorific value - Definition, Gross or Higher calorific value & Net or lower calorific value, Dulong's formula & numerical for calculations of Gross and Net calorific values. Solid fuels - Analysis of coal - Proximate and Ultimate Analysis - numerical problems and significance. Combustion - Calculations for requirement of only oxygen and air (by weight and by volume only) for given solid & gaseous fuels. | 1,2,4 | 6 |
| 5 | <b>Title</b> | <b>Polymers</b><br>Molecular weight (Number average and weight average), Numericals problems on molecular weight, Effect of heat on the polymers (Glass transition temperatures), Viscoelasticity, Conducting polymers, Classification-Thermoplastic and Thermosetting polymers, Compounding of plastic, Fabrication of plastic by Compression, Injection, Transfer and Extrusion molding, Preparation, properties and uses of PMMA, Butyl Rubber, PTFE and Kevlar                                                                                 | 1,2,4 | 5 |

| Exp. No. | List of Experiments                                                                            |
|----------|------------------------------------------------------------------------------------------------|
| 1        | To determine the emf of a given cell potentiometrically.                                       |
| 2        | To determine the moisture and Ash content in the given fuel sample.                            |
| 3        | To determine the percentage of volatile matter of a given sample by steam distillation method. |
| 4        | To determine the COD value of a given sample.                                                  |
| 5        | To determine the pH value of a given sample.                                                   |
| 6        | To Remove hardness of water by ion-exchange method.                                            |
| 7        | To determine the cobalt ion concentration by colorimetry method.                               |
| 8        | To determine the conductance of a given sample                                                 |

**Course Assessment:**

**Theory:**

**ISE-1:**

Activity: Quiz and assignments 20 Marks

**ISE-2:** Two hours 20 Marks

Activity: Article Discussion, Quiz and Assignments

Outcome: Reflective Journal

**MSE:** 90 minutes **30 Marks** written examination based on 50% syllabus

**ESE:** 90 minutes **30 Marks** written examination based on remaining syllabus after MSE

**Lab:**

**ISE:**

**1. ISE-1** will be conducted for four experiments. Continuous pre-defined rubrics-based evaluation for 20 marks.

**2. ISE-2**

a. Four experiments. Continuous pre-defined rubrics-based evaluation for 20 marks.

b. Reflective journal analysis on the given problem statement for 10 marks

**Course Assessment:**

**(i) Theory:**

**ISE-1 for 20 Marks:**

- (a) Tutorial on independent solving of numerical examples (10 marks) - 2 hours
- (b) Multiple choice questions (MCQ) - 10 marks (1 hour)

**ISE-2 for 20 Marks:**

- (a) Multiple choice questions (MCQ) - 10 marks (1 hour)
- (b) Circuit simulation for 10 marks

**MSE:** 90 minutes **30 Marks** written examination based on 50% syllabus

**ESE:** 90 minutes **30 Marks** written examination based on remaining syllabus after MSE

**(ii) Lab: 40 Marks (08 experiments of 05 marks each) + 10 Marks (activity based) = 50 Marks**

**ISE:**

**1. ISE-1** will be conducted for four experiments. Continuous pre-defined rubrics-based evaluation for 20 marks.

**2. ISE-2**

- a. Four experiments. Continuous pre-defined rubrics-based evaluation for 20 marks.
- b. Activity: Oral examination / viva-voce (10 marks)

**Proposed List of Laboratory Experiments:-**

1. Verification of Mesh and Nodal analysis.
2. Verification of Superposition Theorem.
3. Verification Maximum Power Transfer Theorem.
4. Measurement of electrical parameters for alternating sinusoidal voltage (AC)
5. To find resonance conditions in a R-L-C series resonance circuit
6. To measure relationship between phase and line, currents and voltages in three phase system
7. Forward & reverse bias characteristics of PN junction diode
8. Application of PN junction diode – rectifiers (full-wave)

**Society of St. Francis Xavier, Pilar's**  
**Fr. Conceicao Rodrigues College of Engineering**  
**Fr. Agnel Ashram, Bandstand, Bandra (W), Mumbai – 400 050**  
**(Autonomous College affiliated to University of Mumbai)**

**(iii) Tutorial:** *(Minimum 10 Tutorials covering all modules)*

1. **ISE-1** for 20 Marks: Based on first 04 Tutorials of 5 marks each
2. **ISE-2** for 30 Marks : Based on remaining tutorials (Minimum 6 tutorials)

Proposed List of Tutorials

| No | Topics                                                                                | Module                   |
|----|---------------------------------------------------------------------------------------|--------------------------|
| 1  | Series & Parallel circuits, Star-Delta Transformation                                 | DC circuit               |
| 2  | Mesh & Nodal Analysis                                                                 | DC circuit               |
| 3  | Source transformation, Superposition Theorem                                          | DC circuit               |
| 4  | Thevenin's Theorem, Maximum Power Transfer Theorem                                    | DC circuit               |
| 5  | AC fundamentals (ac waveform's instantaneous value, rms, avg, phasor algebra)         | AC circuits              |
| 6  | Analysis of Series AC circuits                                                        | AC circuits              |
| 7  | Analysis of Parallel AC circuits                                                      | AC circuits              |
| 8  | Series resonance                                                                      | AC circuits              |
| 9  | Analysis of three phase AC circuits (star connected load), Power in 3 phase circuits. | Three phase AC circuits  |
| 10 | Analysis of three phase AC circuits (Delta connected load), Phasor diagrams.          | Three phase AC circuits  |
| 11 | Single phase transformer (Numerical based on EMF equation )                           | Single phase transformer |
| 12 | DC machines (Theory only)                                                             | DC machines              |
| 13 | Rectifier and filter (Theory only)                                                    | Semiconductor Diodes     |

**Fr. Conceicao Rodrigues College of Engineering**  
**Fr. Agnel Ashram, Bandstand, Bandra (W), Mumbai – 400 050**  
**(Autonomous College affiliated to University of Mumbai)**

**Course Assessment:**

**Theory:**

**ISE-1: 20 marks**

1. Quiz/ crossword ...10 Marks
2. Open book test ....10 marks

**ISE-2: 20 Marks**

1. Case study ...10 Marks
2. Oral examination....10 marks

**MSE:** 90 minutes **30 Marks** written examination based on 50% syllabus

**ESE:** 90 minutes **30 Marks** written examination based on remaining syllabus after MSE

**Laboratory Assessment:**

**40 Marks (08 experiments of 05 marks each) + 10 Marks (activity based) = 50 Marks**

**ISE:**

1. **ISE-1** will be conducted for four experiments. Continuous pre-defined rubrics-based evaluation for 20 marks.
2. **ISE-2**
  - a. Four experiments. Continuous pre-defined rubrics-based evaluation for 20 marks.
  - b. Activity based: Testing and debugging activity for 10 marks

**Course Assessment:**

**Lab:**

**ISE:**

**1. ISE-1**

- a. Assignment on Module 1 for 20 marks
- b. Assignment on Module 2 for 20 marks
- c. Group activity on (network troubleshooting) Module 3 for 10 marks

**2. ISE-2**

- a. Quiz on Module 4 for 10 marks
- b. Assignment (PCB implementation) on Module 4 for 30 marks
- c. Group activity on Module 5 for 10 marks

|----------------------------|-----|---------------------------------------------------------------------------------------------------------------------------------------|----|
| Course Outcomes            | CO1 | Enumerate the main characteristics of education system in Vedic and post Vedic period to enrich the intellectual imagination          |    |
|                            | CO2 | Review the ancient discovery and research in Indian number system and ancient Indian mathematics                                      |    |
|                            | CO3 | Review the contribution from Ancient Indian system to astronomy and metallurgy                                                        |    |
|                            | CO4 | Trace the significant developments in Indian engineering and technology in Irrigation, painting, surgical techniques and shipbuilding |    |
|                            | CO5 | Cultivate a deep sense of identity and pride in enriched scientific Indian heritage                                                   |    |

|------------|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|------|
| 1          | 1.1      | What is Indian Knowledge System (IKS)? Why do we need it? Salient aspects of IKS.                                                                                                                    | 1    | 2    |
|            | 1.2      | The Vedic Corpus: Introduction to Vedas, Sub-classification of Vedas, Messages in Vedas, Vedic Life: A Distinctive Features                                                                          | 1    | 3    |
| 2          | 2.1      | Number systems in India, Measurements for time, distance, and weight, Bhūta-Saṃkhyā system, Kaṭapayādi system, Piṅgala and the Binary system                                                         | 1    | 4    |
|            | 2.2      | Unique aspects of Indian Mathematics, Indian Mathematicians and their Contributions, Algebra, Geometry and Trigonometry                                                                              | 1    | 4    |
| 3          | 3.1      | Indian contributions in astronomy, The celestial coordinate system, Elements of the Indian calendar, Notion of years and months, Indian Astronomical Instruments                                     | 1    | 4    |
|            | 3.2      | Wootz Steel, Mining and ore extraction, Metals and Metalworking Technology, Iron and steel in India, Lost wax casting of idols and artefacts, Apparatuses used for extraction of metallic components | 1    | 4    |
| 4          | 4.1      | Irrigation systems and practices in South India, Dyes and painting technology, Surgical techniques, Shipbuilding                                                                                     | 1    | 3    |
|            | 4.2      | Temple architecture in India, Perspective of Arthaśāstra on town planning.                                                                                                                           | 1    | 2    |
| Total      |          |                                                                                                                                                                                                      |      | 26   |

**Society of St. Francis Xavier, Pilar's**  
**Fr. Conceicao Rodrigues College of Engineering**  
**Fr. Agnel Ashram, Bandstand, Bandra (W), Mumbai – 400 050**  
**(Autonomous College affiliated to University of Mumbai)**

**Course Assessment:**

**ISE-1:** Quiz: 20Marks (Two 10 marks each)

Activity: Group Discussion on Indian Knowledge System: 10 Marks

Activity: Creative Activity: 20 Marks

**ISE-2:** Quiz: 20 Marks (Two 10 marks each)

Activity: Reflection discussion on Indian Knowledge System: 10 Marks

Activity: Creative Activity: 20 Marks

**Recommended Books:**

As part of the self-learning component, faculty members will assign specific topics or activities to students as per number of hours given in the above table that align with the course outcomes. Students are expected to independently explore, research, and perform the assigned tasks, thereby enhancing their critical thinking and problem-solving abilities. Upon completion, the faculty will evaluate the work based on appropriate assessment methods defined by the faculty.
