

Fr. Conceicao Rodrigues College of Engineering

Fr. Agnel Ashram, Bandstand, Bandra (W), Mumbai - 400 050 (Autonomous College affiliated to University of Mumbai)

CURRICULUM STRUCTURE SECOND YEAR UG: B.TECH

MECHANICAL ENGINEERING

REVISION: FRCRCE-1-25

Effective from Academic Year 2025-26

Fr. Conceicao Rodrigues College of Engineering

Fr. Agnel Ashram, Bandstand, Bandra (W), Mumbai – 400 050 (Autonomous College affiliated to University of Mumbai)

Preamble:

Greetings and congratulations to all the education partners Fr Conceicao Rodrigues College of Engineering for getting autonomous status to the college from the year 2024-25. University Grant Commission vide letter No. F. 2-10/2023(AC-Policy) dated 23rd Nov 2023 conferred the autonomous status to Fr. Conceicao Rodrigues College of Engineering, Fr. Agnel Ashram, Bandstand, Bandra (West), Mumbai 400050 affiliated to University of Mumbai for a period of 10 years from the academic year 2024-2025 to 2033-2034 as per clause 7.5 of the UGC (Conferment of Autonomous Status Upon Colleges and Measures for Maintenance of Standards in Autonomous Colleges) Regulations,2023. We look towards autonomy as a great opportunity to design and implement curriculum sensitive to needs of Learner, Indian Society and Industries.

Government of Maharashtra has also directed Autonomous Colleges to revise their curriculum in line with National Education Policy (NEP) 2020 through Government Resolution dated 4th July 2023. We commit to ourselves to the effective implementation of UGC Regulations and NEP 2020 in its spirit.

Based on recent recommendations of the GR, we are pleased to offer our holistic curriculum for 2024-28, a "H-Tree Model" of Engineering Education. A unique "H-Tree Model" of Engineering Education Curriculum is carefully designed to systematically develop IQ (Intelligence Quotient), PQ (Physical Quotient), EQ (Emotional Quotient) and SQ (Spiritual Quotient) of a learner. This curriculum aims at the development of an all-rounded personality with holistic approach to education in which learner receives 25% teacher-led learning, 25% peer learning, 25% self-learning and 25% experiential learning. The curriculum model is outcome based that focuses on learning by doing. Curriculum is designed to provide multiple learning opportunities for students to acquire and demonstrate competencies for rewarding careers. It ensures multiple choices to leaner acquiring skills through systematic planning. It has 7 verticals aligned to GR recommendations with strong science, and mathematics foundation and program core, sequel of electives, Multidisciplinary Minor courses, humanities & management courses and sufficient experiential learning through projects and semester-long industry / research internship along with employable skill-based courses. Learner gets an opportunity to acquire skills through NSDC aligned courses during summer vacations. Learner also gets additional option to choose the kind of degree i.e. Honors or Double Minor or Honors with Research.

Various steps are taken to transform teaching learning process to make learning a joyful experience for students. We believe that this curriculum will raise the bar of academic standards with the active involvement and cooperation from students, academic and administrative units.

Fr. Conceicao Rodrigues College of Engineering

Fr. Agnel Ashram, Bandstand, Bandra (W), Mumbai – 400 050 (Autonomous College affiliated to University of Mumbai)

Curriculum Structure for UG Programs at Fr CRCE w.e.f. A.Y. 2025-26

Nome	enclature of the courses in the curriculum
Abbreviation	Title
BSESC	Basic Science & Engineering Science Courses
PCPEC	Program Core and Program Elective Courses
MDC	Multidisciplinary Courses
SC	Skill Courses
HSSM	Humanities, Social Sciences and Management
EL	Experiential Learning
LLC	Liberal Learning Courses
BSC	Basic Science Courses
ESC	Engineering Science Courses
PCC	Program Core Courses
PEC	Program Elective Courses
MDM	Multidisciplinary Minor
OE	Open Elective
VSEC	Vocational and Skill Enhancement Course
VSC	Vocational Skill Courses
SEC	Skill Enhancement Courses
AEC	Ability Enhancement Course
EEMC	Entrepreneurship, Economics and Management Course
IKS	Indian Knowledge System
VEC	Value Education
RM	Research Methodologies
CEFP	Community Engagement or Field Project
ELC	Experiential Learning Courses
PRJ	Project
INT	Internship
CC	Cocurricular Courses
HMM	Honors and Multidisciplinary Minor
DM	Double Minor
RMM	Research and Multidisciplinary Minor

Credit Specification:

- ❖ Theory: 1 credit=13 to 15 hrs of teaching
- ❖ Lab: 1 Credit=26 to 30 hrs of lab work
- ❖ Studio Activities: 1 Credit= 26 to 30 hrs of creative activities
- ❖ Workshop Based Activities: 1 Credit=26 to 30 hrs of hands-on activities related to vocation/professional practice/skill based
- ❖ Seminar/Group Discussion: 1 Credit=13 to 15 hrs of participation
- ❖ Internship: 1 Credit=Per 2 weeks OR 36 to 40 hrs of engagement
- ❖ Field Based Learning/Practices: 1 Credit=26 to 30 hrs of learning activities
- ❖ Community Engagement Projects: 1 Credit=26 to 30 hrs of contact time along with 13 to 15 hrs of activities preparation, report writing, independent reading etc.

Fr. Conceicao Rodrigues College of Engineering

Fr. Agnel Ashram, Bandstand, Bandra (W), Mumbai – 400 050 (Autonomous College affiliated to University of Mumbai)

Credit requirements for four different options of the Degrees:

Degree/SEM	I	II	III	IV	V	VI	VII	VII	Tota
								I	l
B.Tech with	20	20	22	22	22	22	20	20	168
Multidisciplinary Minor									
B.Tech with	20	20	22	22	22	22	20	20	188
Double Minor (Multidisciplinary &		+2	+4	+4	+4*	+4	+2\$	+2\$	
Specialisation Minor)		*	*	*		*			
B.Tech with	20	20	22	22	22	22	20	20	188
Research and Multidisciplinary Minor		+2	+4	+4	+4*	+4	+2\$	+2\$	
		*	*	*		*			

^{*}Optional Credits \$ credits (2) to be earned in VII/VIII Salient Features of Curriculum:

- ✓ Framed as per Government Resolution dated 4th July 2023 in line with National Education Policy (NEP) 2020.
- ✓ Minimum 168 choice-based credit structure with options of Degrees earning additional credits
- ✓ Unique 'H-Tree' Model of Curriculum: Hybrid model for holistic development with happy learning environment having bridge connecting verticals providing unique path for each learner for 3-dimensional growth, Life Long Learning, multiple entry-exit, inclusive model indicating equal distribution of central resources
- ✓ More emphasis on laboratory based and experiential learning
- ✓ More weightage to continuous assessment to reduce examination stress
- ✓ Mandatory Semester-long internship, courses with emotional & spiritual learning and skill-based learning aligned with NSDC framework
- ✓ Well balanced curriculum to attain Program Outcomes and skills of 21st century learner
- ✓ Curriculum is designed to create excitement among learners for education through stories, activities, collaboration, hackathon, contest, case studies, creative art etc.

Curriculum is designed to make graduates responsible citizens of country with future ready skills to handle challenges of 21st Century

Fr. Conceicao Rodrigues College of Engineering

@MDM should be Technical courses related to MDM

Project or Internship is mutually exclusive in SEM-VII or SEM-VIII

Remaining credits can be acquired in SEM-V to SEM-VIII

- # Online course 1 Credit=4 Week course from SWAYAM can be taken in SEM V to SEM VIII
- # Online min 8 week course from SWAYAM can be taken in SEM V to SEM VIII to complete 2 credit course (Combination of two 4-week credit courses shall be allowed with prior approval)
- * Online min 12 week course from SWAYAM can be taken in SEM V to SEM VIII to complete 3 credit course

List of Program Elective Courses:

Track-1: Manufacturing and Management

SEM-V: Any one Theory:

PEC13ME11: Supply chain management PEC13ME12: Costing and Cost Control

PEC13ME13: Mould and Metal Forming Technology

PEC13ME14: Additive Manufacturing

Lab:

PEC13ME15: Additive Manufacturing

SEM-VI: Any two Theory:

PEC13ME16: Tool Engineering

PEC13ME17: Advanced Materials

PEC13ME18: Optimization Techniques

PEC13ME19: Project Management

PEC13ME110: Industrial Engineering and Operations Research

Lab:

PEC13ME111: Manufacturing Systems

PEC13ME112: Industrial Engineering and Operations Research

Track-2: Design and Automation

SEM-V: Any one Theory:

PEC13ME21: Control Engineering PEC13ME22: Finite Element Analysis PEC13ME23: Dynamics of Machinery

Lab:

PEC13ME24: Condition Monitoring

SEM-VI: Any two Theory:

PEC13ME25: Industrial Robotics

PEC13ME26: Modelling and Simulation

PEC13ME27: Design of Mechanical Systems

Fr. Conceicao Rodrigues College of Engineering

Fr. Agnel Ashram, Bandstand, Bandra (W), Mumbai – 400 050 (Autonomous College affiliated to University of Mumbai)

PEC13ME28: Product Design and Development

Lab:

PEC13ME29: Robotics and Control Engineering

PEC13ME210: Product Design

Pre-requisite Course Codes	None	
	CO1	Understand the difference between traditional and additive manufacturing techniques including solid-based, liquid-based, and powder-based techniques.
	CO2	Describe the working principle, material removal mechanism and process parameters for Hybrid machining.
Course Outcomes	СОЗ	Identify and understand the MEMS and Non-MEMS based manufacturing techniques.
	CO4	Understand basic Nano finishing techniques.
	CO5	Describe metal joining processes along with their advantages, disadvantages, and applications.
	CO6	Comprehend the Composite manufacturing and powder metallurgy process along with its advantages, disadvantages, and applications.

Module No.	Topics	Ref	Hrs.
1	Introduction to Additive Manufacturing (AM), Subtractive manufacturing v/s Additive Manufacturing, Powder-based AM processes: Selective laser sintering (SLS), Electron beam melting. Solid-based AM process: Fused deposition modelling (FDM), Laminated object manufacturing (LOM). Liquid based AM Process: Stereo lithography (SLA).	1	04
2	Introduction to Hybrid machining: Electric discharge grinding (EDG), Electro chemical grinding (ECG), Electro stream drilling (ESD), Electro chemical deburring (ECD), Laser assisted machining (LAM) and Shaped tube electrolytic machining (STEM). Working principle, Material removal mechanism, Identification of process parameters, Advantages, Disadvantages and Applications.	3	05
3	Introduction to Micro Manufacturing Techniques: Challenges in Meso, Micro, and Nano manufacturing. NON – MEMS based - Traditional Micromachining (Micro turning, Micro Milling, Micro grinding, Diamond turning).	2	05

Fr. Conceicao Rodrigues College of Engineering

Fr. Agnel Ashram, Bandstand, Bandra (W), Mumbai – 400 050 (Autonomous College affiliated to University of Mumbai)

	Total		26
6	Polymeric composites manufacturing processes: Thermoset and Thermoplastic composite processing, advantages & disadvantages. Manufacturing process for thermoset composites (applications, basic processing steps, advantages and limitations only) prepeg layup, wet layup, spray up, filament winding, pultrusion and resin transfer molding. Powder Metallurgy: Powder manufacturing methods; Advantages, disadvantages, and applications of powder metallurgy. Case studies like Oil Impregnated Bearings.	5	04
5	Metal Joining Processes: Gas welding, Arc welding, Resistance, Radiation, Solid state and Thermo-chemical welding processes, soldering and brazing processes, welding defects, inspection & testing of welds, Safety in welding.	4	04
4	vapor deposition (CVD); Physical vapor deposition (PVD), optical and electron beam lithography; Dry and wet etching. Introduction to Nano Finishing Techniques: Abrasive Flow Machining (AFM), Magnetic Abrasive Finishing (MAF), Magneto rheological Finishing (MRF), Magneto rheological Abrasive Flow Finishing (MRAFF), Magnetic Float Polishing (MFP), Elastic Emission Machining (EEM), Chemical Mechanical Polishing (CMP).	2	04
	MEMS based - Overview about micro fabrication methods - Chemical

Course Assessment:

Theory:

ISE-1:

Team Activity: (Two Hours Duration)

Activity may consists of following:

Debate (For Example Friction is Good or Bad)

Making Model of Some Concepts

Any other suitable activity

Assessment will be done by two teachers in the department who are teaching engineering graphics

ISE-2: Two hours 20 Marks Quiz

on Above Topics

MSE: 30 Marks written examination based on 50% syllabus of 90 Minutes Duration ESE: 30 Marks written examination based on remaining 50% syllabus and of 90 Minutes Duration

Lab:

Part B (Lab)

	Experiments to be completed in Lab	
E1	Verification of Polygon law of coplanar forces	2
E2	Verification of Principle of Moments (Bell crank lever.)	2
E3	Determination of support reactions of a Simply Supported Beam.	2
E4	Determination of coefficient of friction) using inclined plane	2
E5	Collision of elastic bodies (Law of conservation of momentum).	2
E6	Kinetics of particles. (collision of bodies)	2
	Assignments to be completed in Lab	
A1	Resultant of Coplanar force system and Non Coplanar Force System	2
A2	Centroid of Composite plane Laminas	2
A3	Equilibrium of System of Coplanar Forces	2
A4	Kinematics of particles (Variable acceleration + Motion Curves +Projectile motion)	2
A5	Kinetics of particles (D'Alemberts Principle, Work Energy Principle, Impulse momentum Principle, Impact and Collisions.)	2
	Total	22

Course Outcomes	CO2	To demonstration awareness of taxation policies and show respect
		towards
		government norms and regulations
	CO3	To prepare investment plan by understanding owns futuristic
		needs

Financial Planning: It is possible to manage income more effectively through financial planning. Managing income helps to understand how much money is required for tax payments, other expenditures and savings. It increases cash flows by carefully monitoring the spending patterns and expenses. Knowledge of comprehensive financial planning will help students to make right financial decisions in their life. It gives guidance in helping choose the right types of investments to fit needs, personality, and goals of their life. In this activity students need to prepare the financial plan for their life.

Taxation Policies: Taxes are levied in almost every country of the world, primarily to raise revenue for government expenditures, although they serve other purposes as well. The simple fact in economics is that there are certain common public goods and public needs that require some form of government and regulation to provide or promote. Taxation is the way to pay for these common goods. In this activity student will learn various types of taxes like Income tax, Corporate tax, Capital gains, Property tax, Inheritance and Sales tax.

Investments: Investments are important because in today's world, just earning money is not enough. But that may not be adequate to lead a comfortable lifestyle or fulfil our dreams and goals. Money lying idle in the bank account is an opportunity lost. Therefore, students should have a knowledge to invest money smartly to get good returns out of it. This activity will give insight to the students about investment in the form of Stocks, Mutual Funds, Fixed Deposits, Recurring Deposit, Public Provident Fund, Employee Provident Fund and National Saving Schemes.

Methodology: Guest lectures or workshops by professionals shall be arranged on Financial Planning, Taxation and Investments. Invite guest speakers, such as tax professionals or financial advisors, shall conduct a tax planning workshop for students. The workshop can cover topics such as tax-efficient investment strategies, retirement planning, and tax-saving opportunities for individuals and businesses. Students should be engaged in assessment driven activities throughout the course. For better learning outcomes following methods of content delivery via student engagement can be adopted.

Investment Simulation Game: Divide students into groups and have them participate in a simulated investment game. Each group is given a virtual budget to invest in stocks, bonds, mutual

Fr. Conceicao Rodrigues College of Engineering

Fr. Agnel Ashram, Bandstand, Bandra (W), Mumbai – 400 050 (Autonomous College affiliated to University of Mumbai)

funds, or other investment vehicles. Throughout the course, they track the performance of their investments and make decisions based on real-world market trends and economic indicators.

Financial Planning Board Game: Design a board game that simulates the process of financial planning, including setting financial goals, creating budgets, managing debt, and making investment decisions. Students play the game in groups, competing or collaborating to achieve their financial objectives.

Stock Market Simulation: Use online stock market simulation platforms that allow students to buy and sell stocks in a virtual trading environment. They can experiment with different investment strategies, track the performance of their portfolios, and compete against their classmates or other teams.

Course Assessment:

ISE-1: Quiz: 20 Marks

Activity: Presentation on Financial Instruments: 10 Marks

Activity: Preparing Investment Portfolio (20 Marks): Assign each student or group of students to create a hypothetical investment portfolio based on specific criteria such as risk tolerance, time horizon, and financial goals. They research different investment options, analyze their potential returns and risks, and justify their portfolio allocations in a written report or presentation.

ISE-2: Quiz: 20 Marks

Activity: Tax Return Case Studies (*Perquisite: Pan Card (if not available, student should immediately apply and get pan card))* (10 Marks): Consider case study of fictional individuals or families and prepare tax returns based on their financial situations. This hands-on activity allows students to apply their knowledge of taxation laws and regulations in a practical context.

Activity: Financial Literacy Podcast (10 Marks): Have students create their own podcasts or audio recordings discussing key concepts related to financial planning, taxation, and investments. They can *interview experts*, share personal finance tips, or discuss current events and trends in the financial industry.

Activity: Personal Finance Blog (10 Marks): Students create their own personal finance blogs or websites where they share articles, tutorials, and resources related to financial planning, taxation, and investments. This activity helps them develop their writing and research skills while sharing valuable information with their peers

25CEP12ME01	Engagement Project		ISE1	MSE	ISE2	ESE	To	otal		
		Theory								
		Practical	50		50		1	00		

Pre-requisi	te Cou	rse Codes				
Course Outcomes	CO1	Identify and address community needs and challenges which help learners to develop problem-solving skills and creativity in finding innovative solutions.				
	CO2	Enhance their cultural competence and ability to work effectively in multicultural settings				
	CO3	Critically think on complex issues considering multiple view points				
	CO4	Demonstrate collaboration, team work, civic engagement, empathy and compassion while engaging directly with community				
	CO5	Develop a lifelong commitment to social justice and making a positive				
		impact in the world				

This course requires students to participate in field-based learning/projects generally under the supervision of faculty. The curricular component of 'community engagement and service' involve activities that would expose students to the socio-economic issues in society so that the theoretical learnings can be supplemented by actual life experiences to generate solutions to real-life problems.

At the end of the course it is expected that students will have valuable learnings in terms of enhanced communication skills, increased cultural competence, improved critical thinking, leadership skills, collaboration skills, empathy & compassion, civic engagement, problem-solving skills, self-reflection & personal growth and long-term commitment to social justice.

It is expected that 26-30 hours of contact time per credit in a semester (52 to 60 hours in a semester for 2 credits) along with 13-15 hours of activities such as preparation for community engagement and service, preparation of reports, etc., and independent reading and study.

Other Guidelines to students for successful Community Engagement:

Community engagement is the process of working collaboratively with and through groups of people affiliated by geographic proximity, special interest, or similar situations to address issues affecting the well-being of those people It is a powerful vehicle for bringing about environmental and behavioral changes that will improve the health of the community and its members. It often involves partnerships and coalitions that help mobilize resources and influence systems, change relationships among partners, and serve as catalysts for changing policies, programs, and practices.

Community engagement project is different as compared to traditional consultation. It is a regular engagement of community for achieving an identified goal or vision. It recognizes the role of community engagement in its broadest sense in the development of local democracy, while noting that the focus of the report is on the practice of community engagement as it relates to local authority activity.

Fr. Conceicao Rodrigues College of Engineering

Fr. Agnel Ashram, Bandstand, Bandra (W), Mumbai – 400 050 (Autonomous College affiliated to University of Mumbai)

Communication, diplomacy, patience, and flexibility are essential to engage with a community. For a successful engagement conditions include: Shared and defined purpose. Willingness to collaborate. Commitment to contributing. Participation of the right people. Open and credible process. Involvement of a champion with credibility and clout. Ensure that the engagement process is complex but manageable. Initially the team will: Discuss and define the initiative and its potential impact. Set the purpose and goals for community engagement. Define the community. Know and respect the community's characteristics. Develop a relationship with the community, build trust, work with formal and informal leadership, find the community gatekeeper, identify the project champion, meet with the local organizations, and learn the assets and challenges for that community. Find the common interests.

The following four phases provide broad outline for the community engagement process: Phase-I: Outreach

Go to the community instead of having the community come to you. Invite the stakeholders to a conversation. Create a constructive environment for dialogue allowing time to get to know the participants remembering that the community's time is valuable and must be respected. Identify the person or the organization that has convened the group and will provide initial leadership and organizational management. Outline the purpose and process for the conversation. Use a facilitator when appropriate. Define the issue and why it is important. Outline what is broken and focus on what is working. Is the issue a people problem or a situation problem? Can the problem be solved with technical expertise or will it require something else? Determine the interest and merit in hosting future discussions.

Phase-II: Gather Facts, Brainstorm and Select

Create an environment for discussion where people are comfortable asking questions, expressing doubts, and brainstorming new ideas. Gather the facts related to the issue and its impact. Use a SWOT, appreciative inquire, asset mapping, and other tools during the factfinding stage. Clarify the issue's alignment with the community's values and ethics. Establish the common ground on which conversations will be based. Brainstorm and gather alternative solutions. Ask the "what if" questions. Spend time discussing the options and the potential impact. Allow the process to equip the participants to see the change, feel the change, and then be prepared to change. Select the best practice/solution. If required use decision-making tools to reduce the number of options.

Phase-III: Plan and Review

Write the implementation action plan. Include the evaluation procedure that will answer the question "What will it look like when the change has happened?". Discuss the proposal with the appropriate stakeholders searching for insight and response. Use the feedback to assess and revise the plan. Stay focused on the solution.

Phase-IV: Implement and Evaluate

Implement the plan. Remember, groups want a rapid success. Identify an action that will provide a "meaningful win" within the "immediate reach." Evaluate the impact. Report the status to the community and gather feedback. Revise the plan and evaluate again.

Keep the participants informed through discussion agendas, written summaries of previous discussions, goals/assignments for the next discussion, and progress reports providing accountability for delivering what was promised.

ISE-1:

Activity: Quizzes on first two modules (20 Marks)

ISE-2:

Activity: Quizzes on last three modules (20 Marks)

MSE: 90 minutes 30 Marks written examination based on 50% syllabus

ESE: 90 minutes 30 Marks written examination based on remaining syllabus after MSE

Tutorial:

1. ISE-1

First three tutorials (20 marks)

Continuous pre-defined rubrics-based evaluation for 20 marks.

2. ISE-2

i. Next four tutorials (20 marks)

Continuous pre-defined rubrics-based evaluation for 20 marks

ii. Presentations (10 Marks)

Students in a group of three to four should study and present the applications of mechanics of solid in real life case examples related to any of the following topics: deformation of solids, simple stress and strain, thermal stress and strain, principal stresses, shear force and bending moment diagrams, deflection and slope, torsion, columns, cylinders, Software analysis etc.

	CO1	Understand the evolution of management theories and their relevance today					
	CO2	Apply planning tools and techniques to real-world business scenarios					
Course Outcomes	СОЗ	Understand effective organizational structures based on business requirements					
	CO4	Study different leadership styles and apply appropriate leadership techniques in various situations.					
	CO5	Recognize ethical dilemmas in management and apply responsible decision-making frameworks.					
	CO6	Study critical thinking and problem-solving techniques to organizational issues.					

Module No.	
	Introduction to Management
1	Definition and Nature of Management: Understanding management as a process and its significance in organizations. Historical Evolution: Exploration of classical management theories, including contributions from Henri Fayol and Frederick Taylor. Managerial Roles and Skills: Analysis of the roles managers play and the skills required at different managerial levels.
2	Planning Strategic and Tactical Planning: Differentiating between long-term strategic planning and short-term tactical planning. Decision-Making Processes: Tools and techniques for effective managerial decision-making. Goal Setting and Management by Objectives (MBO): Establishing clear objectives and aligning them with organizational goals
3	Organizing Organizational Structure and Design: Examining various organizational structures and their impact on efficiency. Delegation and Authority: Understanding the distribution of authority and responsibility within an organization. Coordination and Communication:

Fr. Conceicao Rodrigues College of Engineering

Fr. Agnel Ashram, Bandstand, Bandra (W), Mumbai – 400 050 (Autonomous College affiliated to University of Mumbai)

	Strategies for effective internal communication and coordination among departments.
4	Leadership Theories and Styles: Study of different leadership models and their applicability. Motivation Techniques: Exploring theories of motivation and their implementation in the workplace. Team Dynamics and Group Behavior: Insights into managing teams and understanding group behavior.
5	Control Systems and Processes Establishing standards and monitoring performance. Financial Controls: Budgeting, financial reporting, and variance analysis. Quality Management: Introduction to quality control techniques and continuous improvement processes.
6	Contemporary Issues in Management Ethics and Social Responsibility: The role of ethics in managerial decisions and corporate social responsibility. Globalization and Management: Challenges and strategies in managing international operations. Innovation and Change Management: Managing organizational change and fostering innovation.

Assessment:

Quiz based on Module 1,2 and 3 (20 Marks) **ISE-1:**

Case study / Application with PPT Presentation (Group of 4 students) of

Decision Making Process Approach, MBO (30 Marks)

ISE-2: Quiz based on Module 4,5 and 6 (20 Marks)

> Case Study / Application / Research Literature Studies with PPT Presentation (Group of 4 students) on Leadership in Organization, Innovation and Change

Management, continuous improvement processes (30 Marks)

Note: ISE will be based on Continuous predefined rubrics based evaluation

Fr. Agnel Ashram, Bandstand, Bandra (W), Mumbai – 400 050 (Autonomous College affiliated to University of Mumbai)

Course Assessment

1. ISE-1 (50marks)

Term work

Printouts/Plots: 40 marks Lab interaction: 10 marks

Using the above knowledge and skills acquired through six modules students should complete Minimum three assemblies from the given sets of assignments using standard CAD modeler like PTC Creo/CATIA/ Solid work/UG /any other suitable software.

Set 1: 3D modeling of basic Engineering components likes Nuts, Bolts, Keys, cotter, Screws, Springs etc.

Set 2: 3D modeling of basic Machine components like Knuckle joint, Couplings: simple, muff, flanged Protected flange coupling, Oldham's coupling, Universal coupling.

2. ISE-2 (50 marks)

Printouts/Plots: 20 marks

- i. 3D modeling of basic Machine components like Clapper block, Single tool post, Shaper tool head slide, jigs and fixtures, element of engine system and Miscellaneous parts.
- ii. Generation of any Assembly model (minimum five child parts) along with Production drawing for any of the system by creating 3D modeling with assembly constraints, Interference check, Exploded view, GD&T, Bill of material.
- iii. Reverse Engineering of a physical model: disassembling of any physical model having not less than five parts, measure the required dimensions of each component, sketch the minimum views required for each component, convert these sketches into 3-D model and create an assembly drawing with actual dimensions
- iv. End Semester Practical/Oral examination:

To be conducted by pair of Internal Examiners

- 1. Practical examination duration is two hours, based on Advance level of the Term work. Oral examination should also be conducted to check the knowledge of CAD Modeling Tools.
- 2. The distribution of marks for practical examination shall be as follows:
- a. Practical Exam20 marks
- b. Oral Exam..... 10 marks
- 3. Evaluation of practical examination to be done based on the printout of students work
- 4. Students work along with evaluation report to be preserved till the next examination
